

# Seismicity in Pennsylvania and the Pennsylvania State Seismic Network (PASEIS)

Andy Nyblade

Department of Geosciences, Penn State University

May 19, 2017

Shale Network Workshop

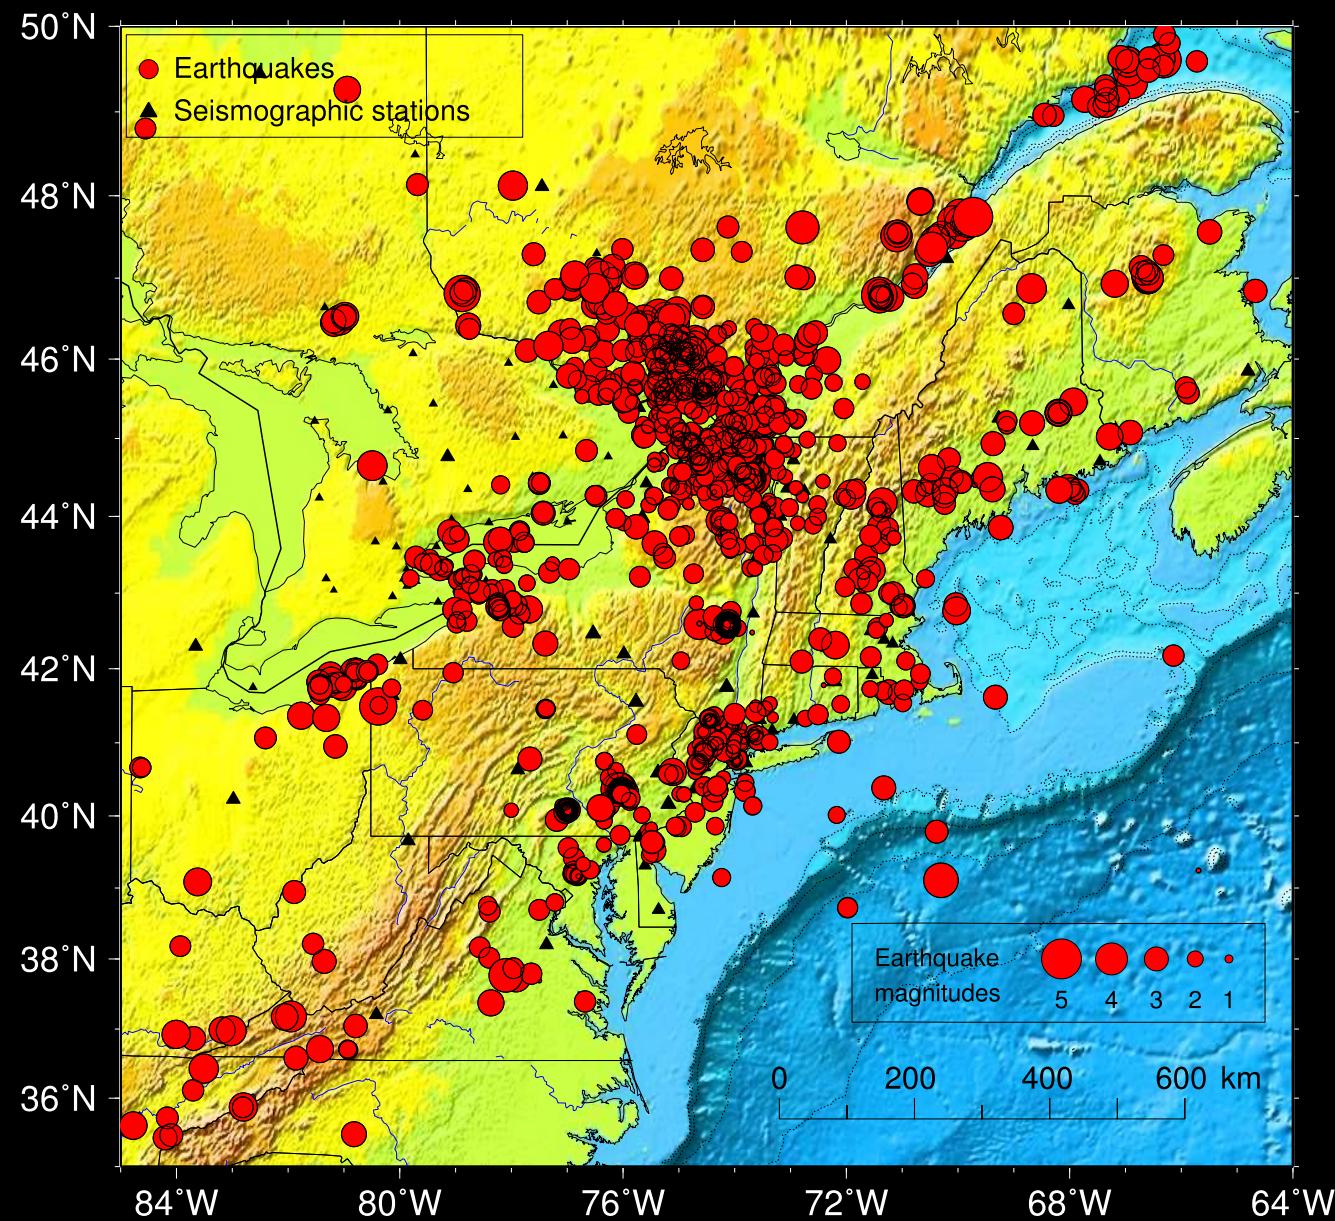

PennState

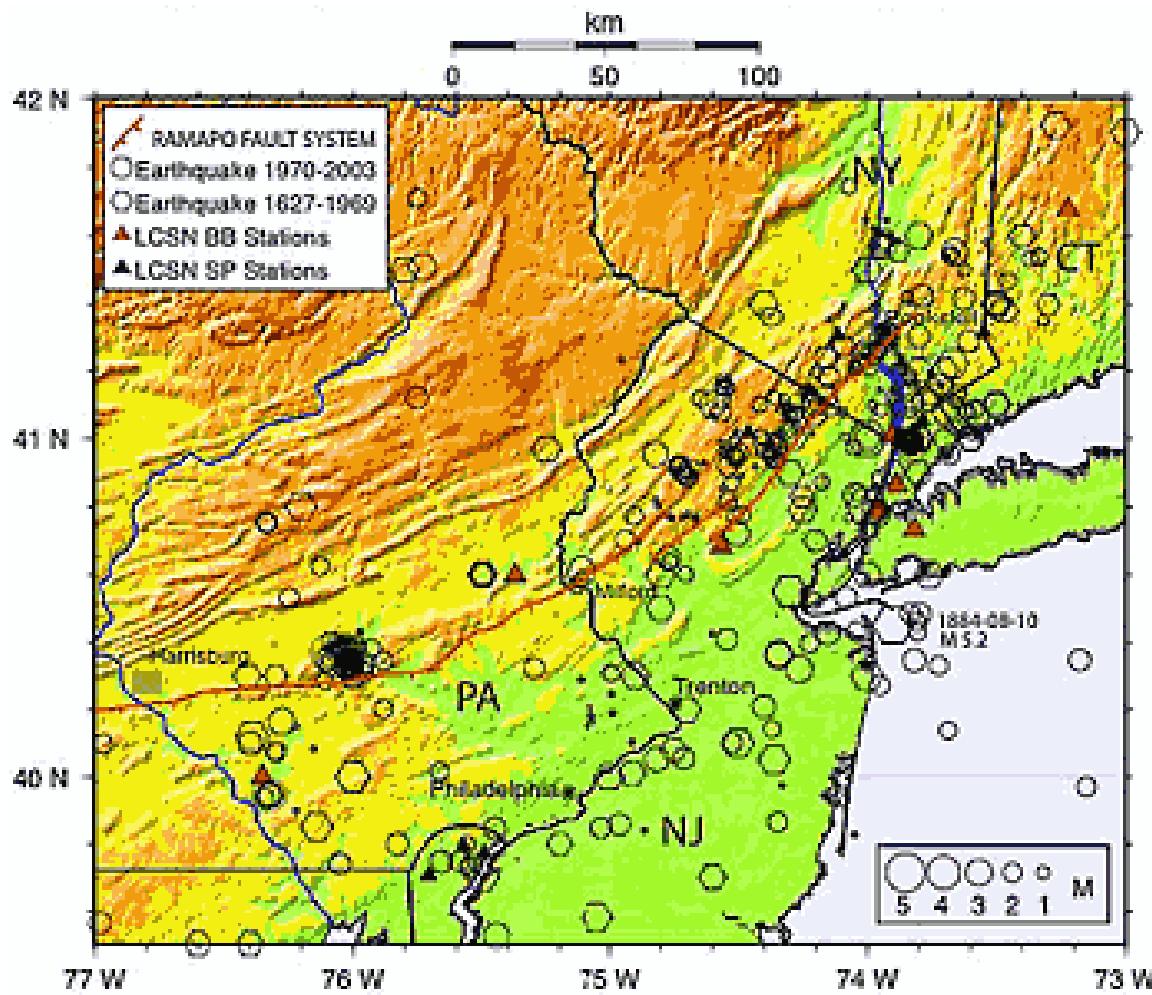

# Introduction

- Review of historic seismicity in PA
- Seismicity in Pennsylvania 2013-2015
- Pennsylvania State Seismic Network (PASEIS)
- Event detection and location
- PASEIS web site

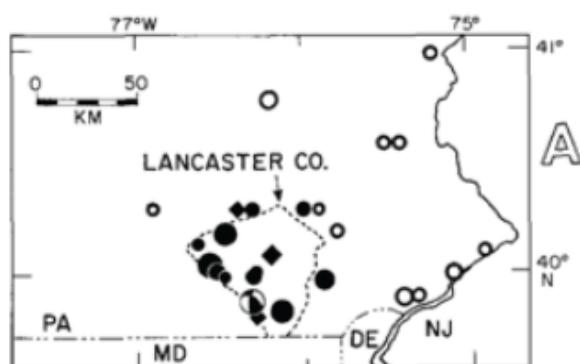

# Earthquakes in NE United States and Canada 1990 - 2010

Earthquake locations by the Lamont Cooperative Seismographic Network, US Geological Survey and the Geological Survey of Canada.  
June 2010, Won-Young Kim, Lamont-Doherty Earth Observatory of Columbia University, <[www.ledo.columbia.edu/LCSN](http://www.ledo.columbia.edu/LCSN)>.

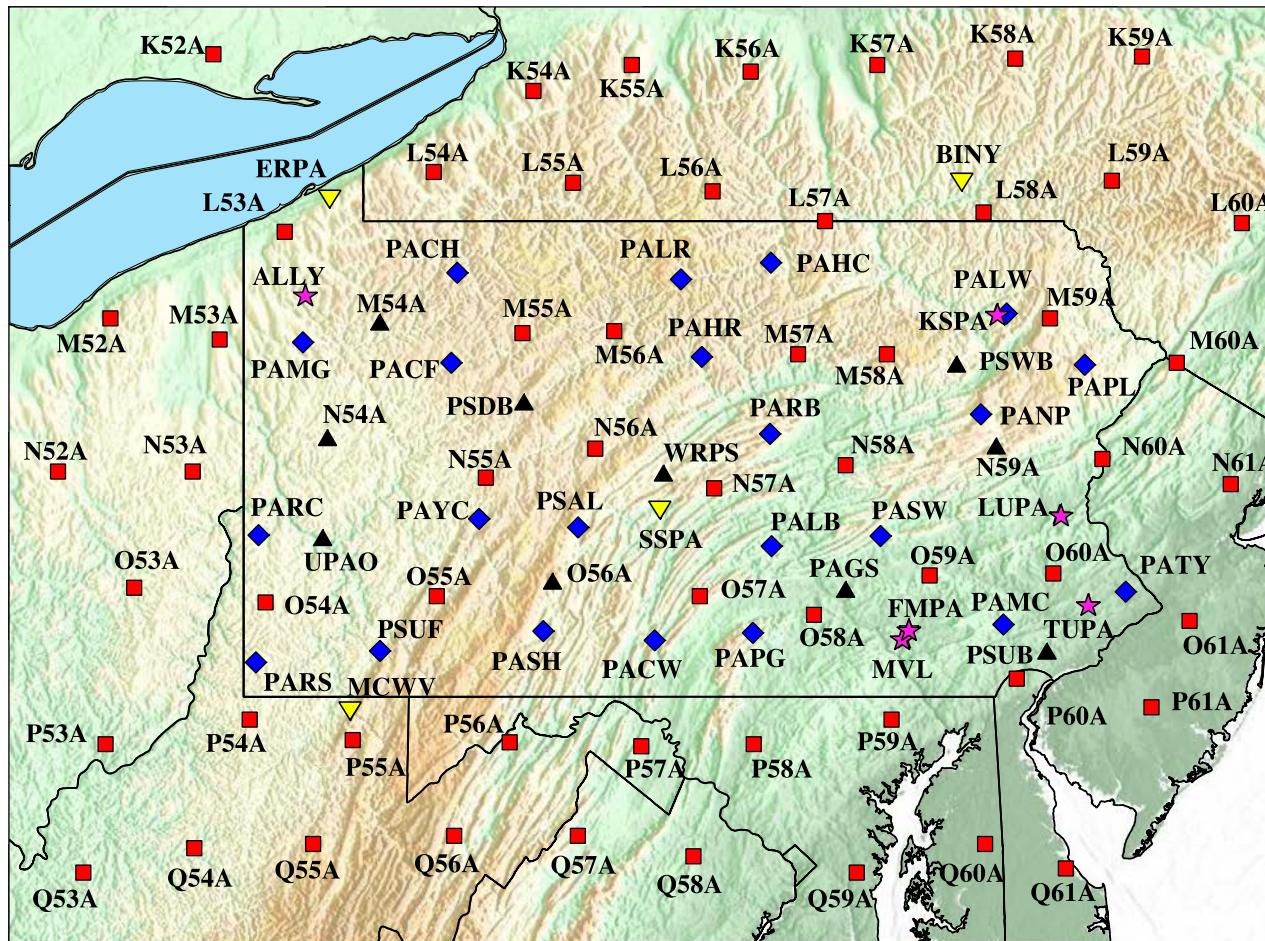

[www.earthinstitute.columbia.edu/  
news/2004/story04-30-04b.html](http://www.earthinstitute.columbia.edu/news/2004/story04-30-04b.html))

Armbruster and Seeber  
(1987)

# Stations 2/2013 to 6/2015

- 101 3-component high quality (broadband) stations
- Recording continuously

# Equipment

RefTek RT130 Datalogger

Broadband 3-component seismometers

GPS Clock

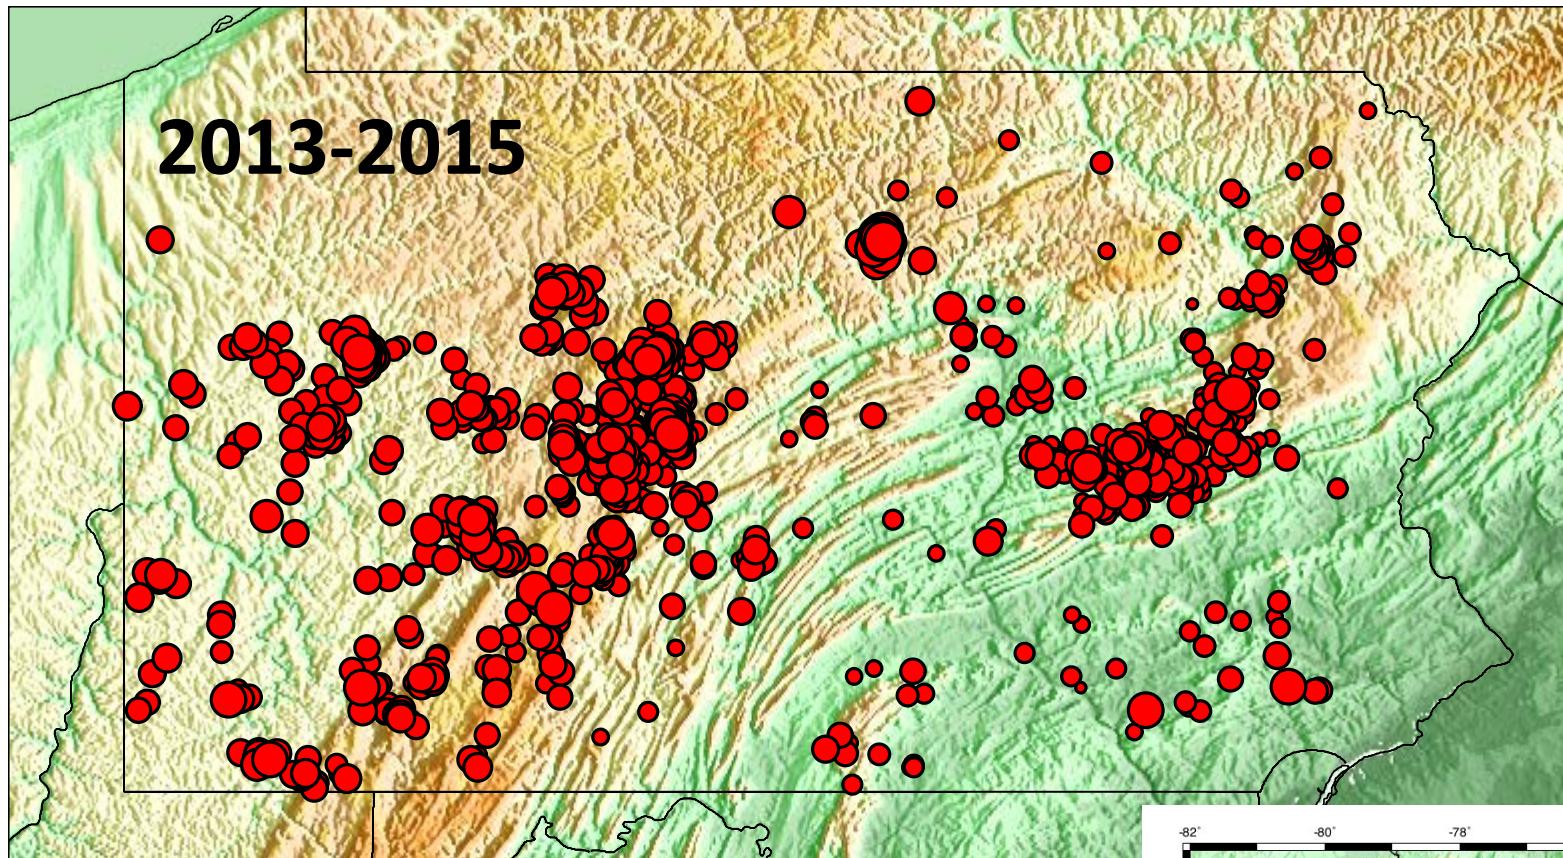

# PA seismicity 2/2013 to 06/2015 (from Kyle Homman's MS thesis, PSU)

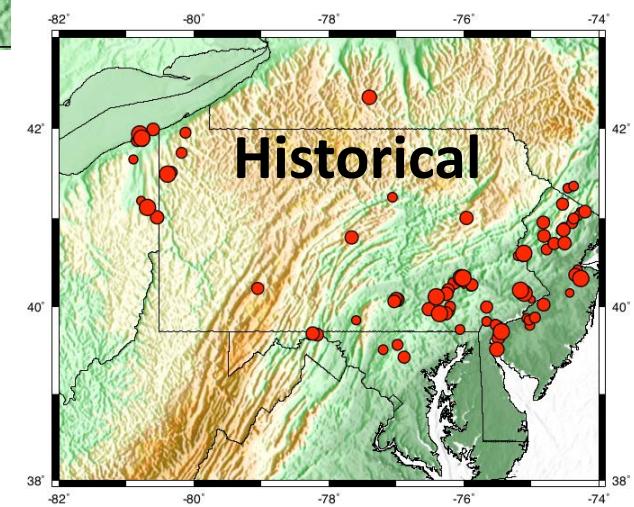

- 1761 events with 1544 located in Pennsylvania

Report can be downloaded from:

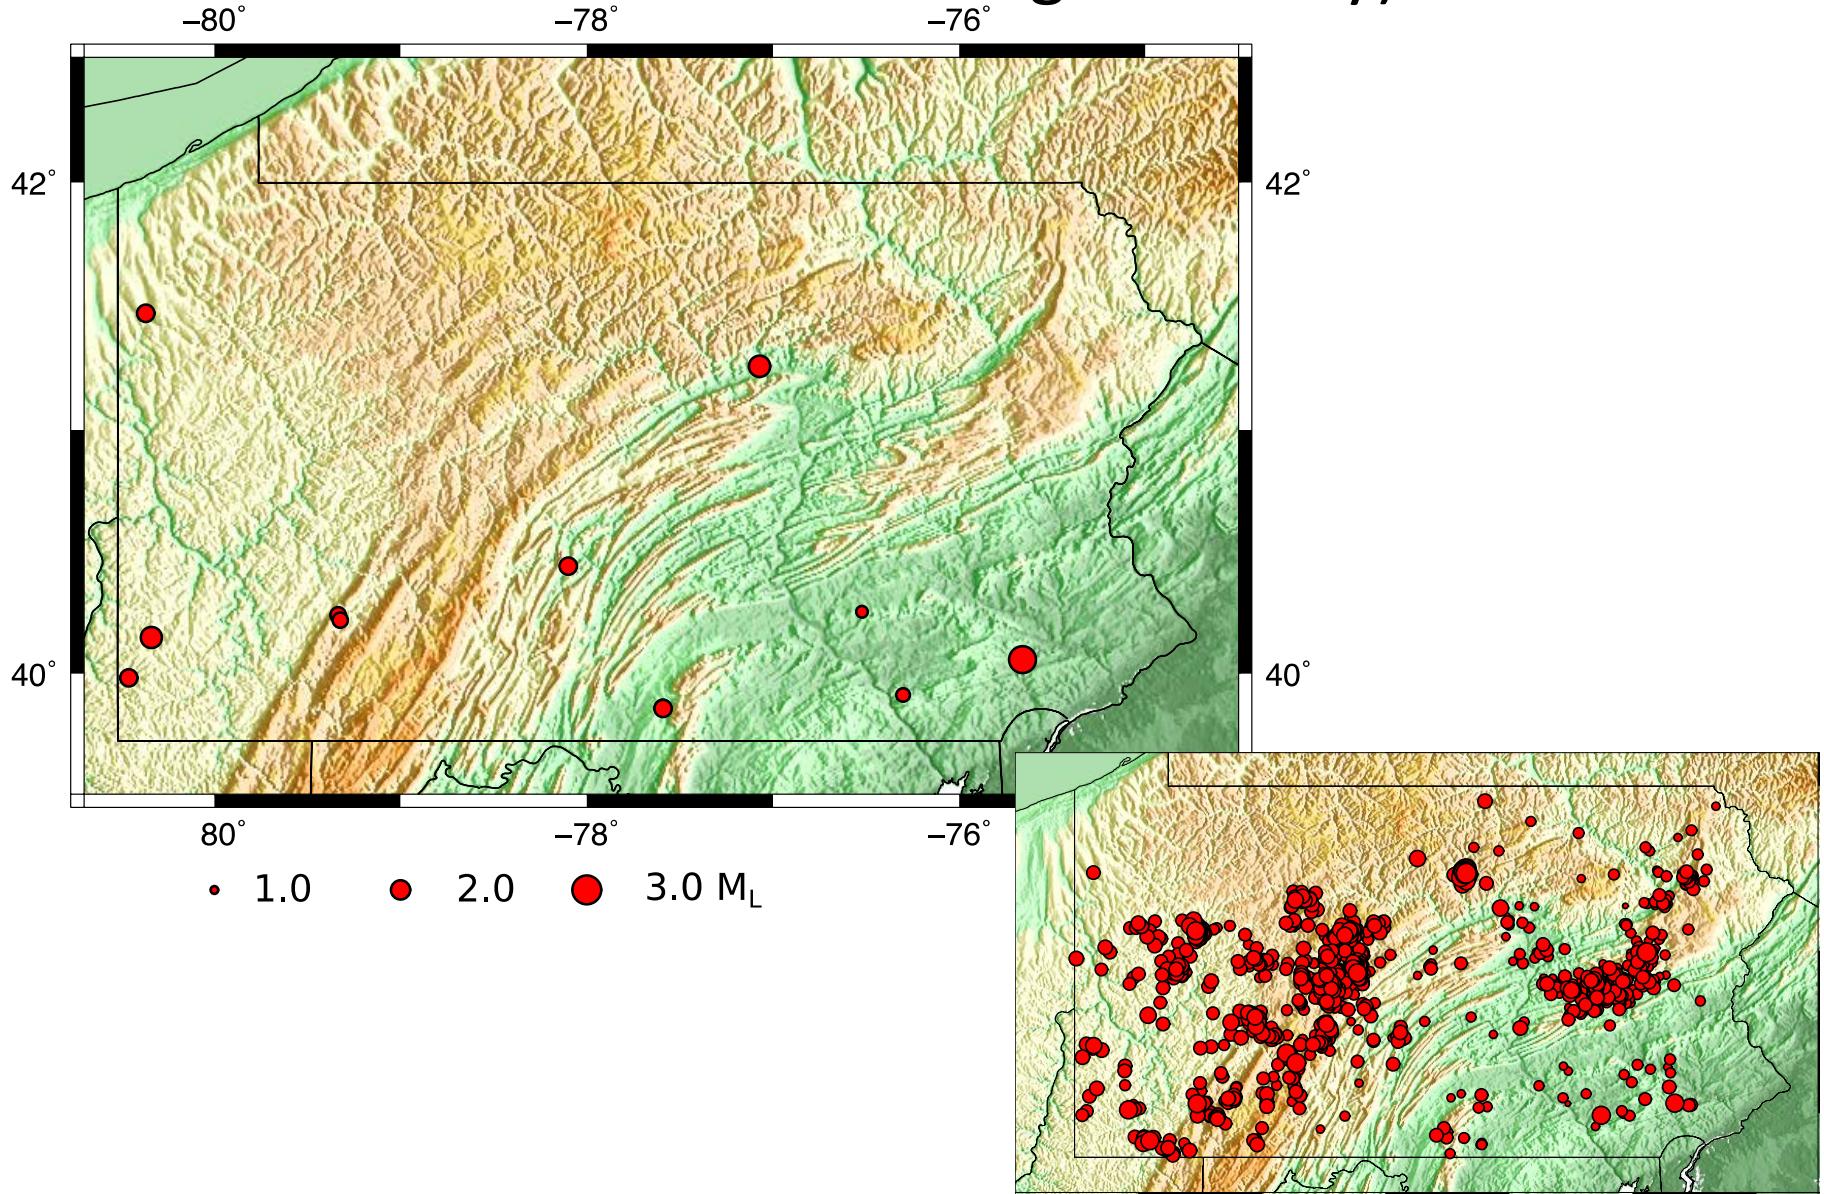

<http://paseis.geosc.psu.edu/background.html>

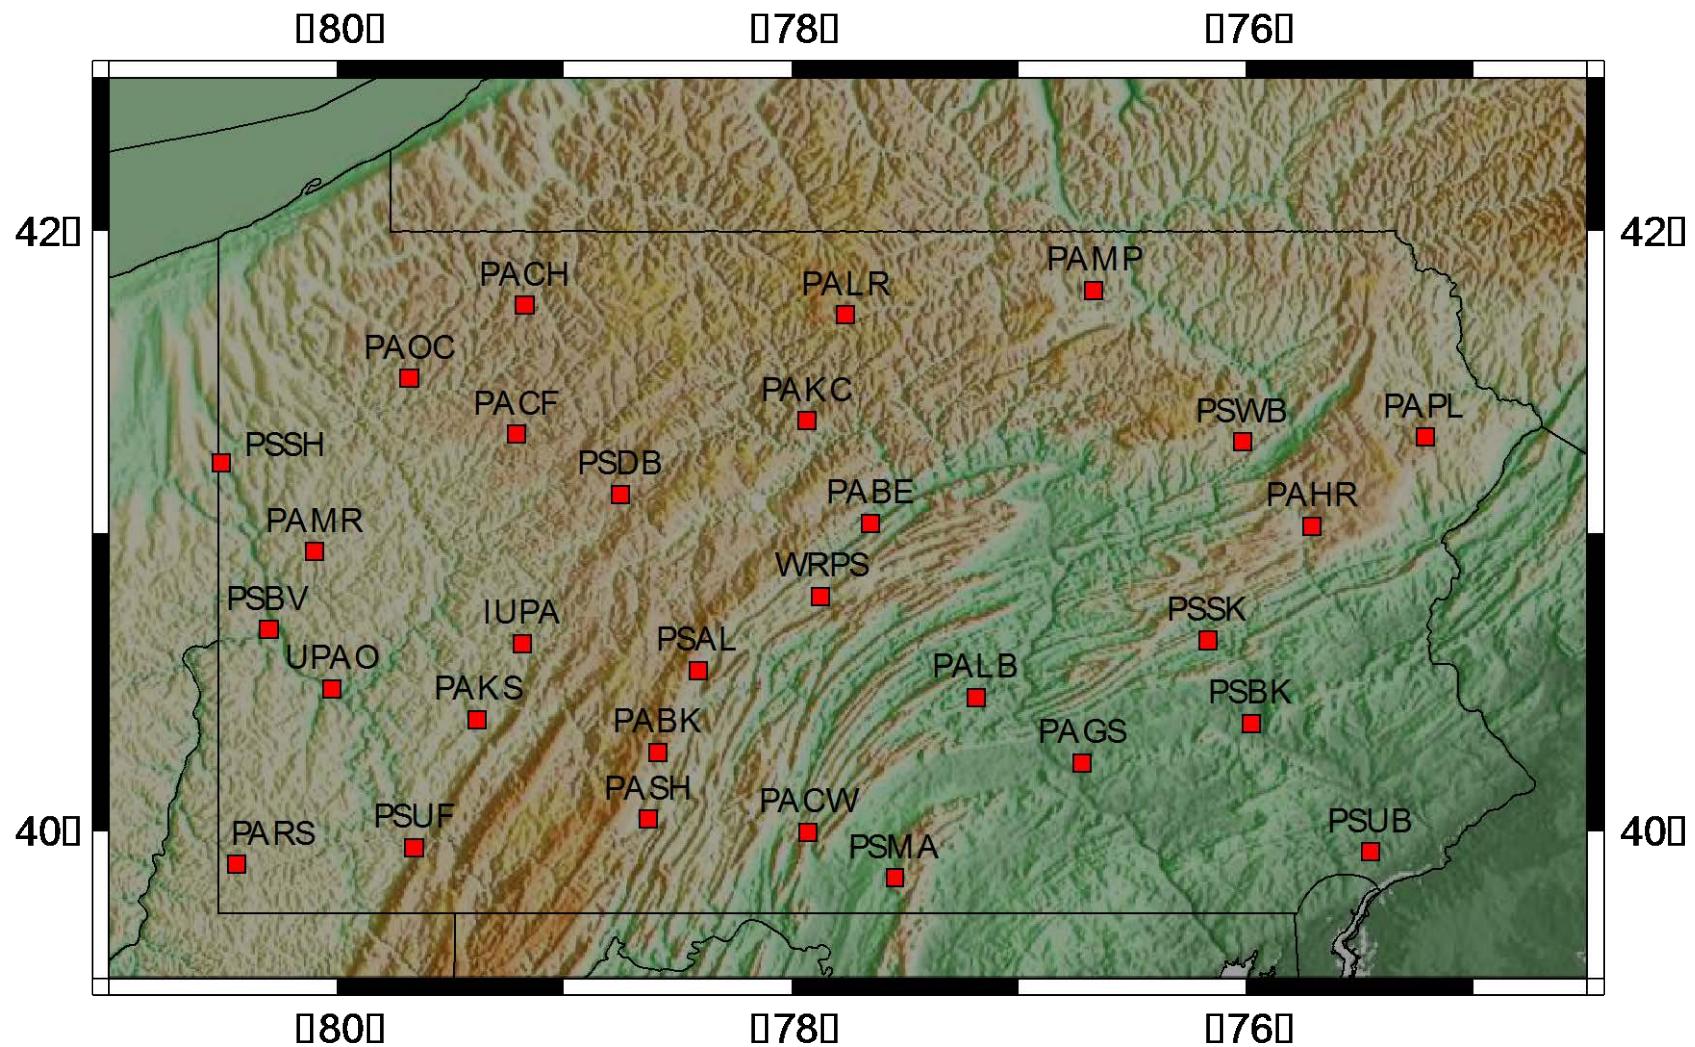

• 1.0      • 2.0      ● 3.0 M<sub>L</sub>

# 14 Non-mining events – probably all earthquakes (no evidence for oil and gas activity)

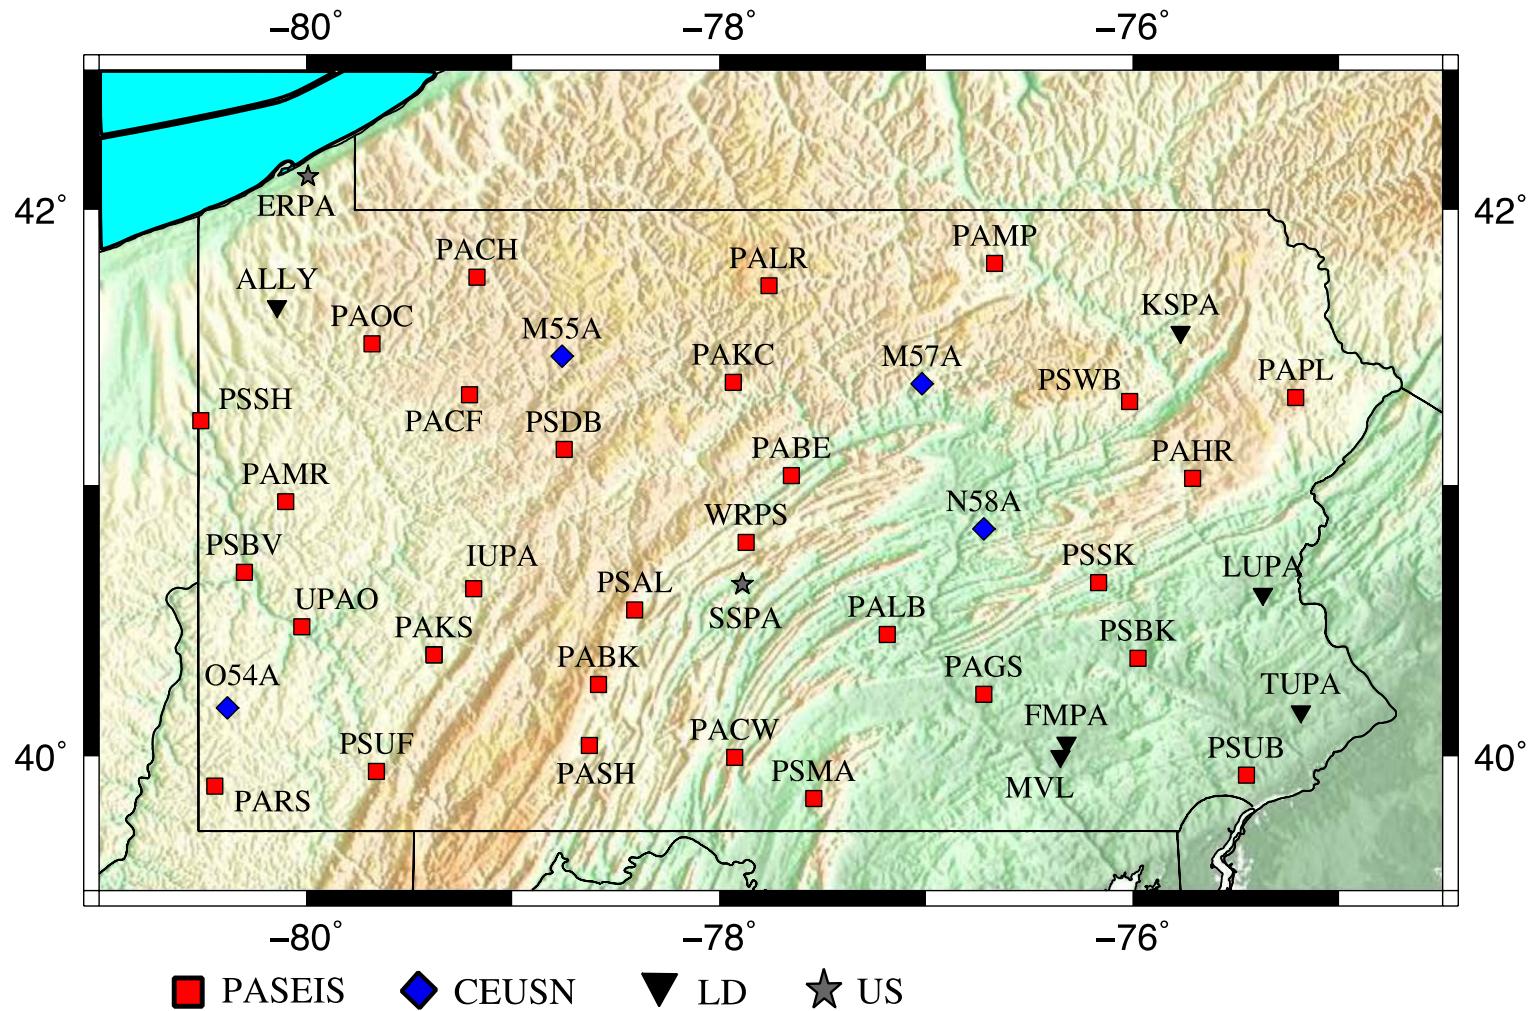

# PASEIS Network Sept. 2016

# Open broadband seismic stations in PA with near real-time telemetry

- 30 stations in the PASEIS network
- 6 stations operated by LCSN (LD)
- 2 stations operated by the USGS (US)
- 4 stations in the CEUSN network operated by IRIS/USGS

# Technical specifications; Network code = PE

Usage

## IRIS DMC MetaData Aggregator

# Stations used to detect and locate seismic events by PASEIS (71 total)

Email Alert received for:  
Magnitude 2.2  
Time: 2016/04/18 Depth  
3.3 miles (5.2 km)  
Near Titusville, PA

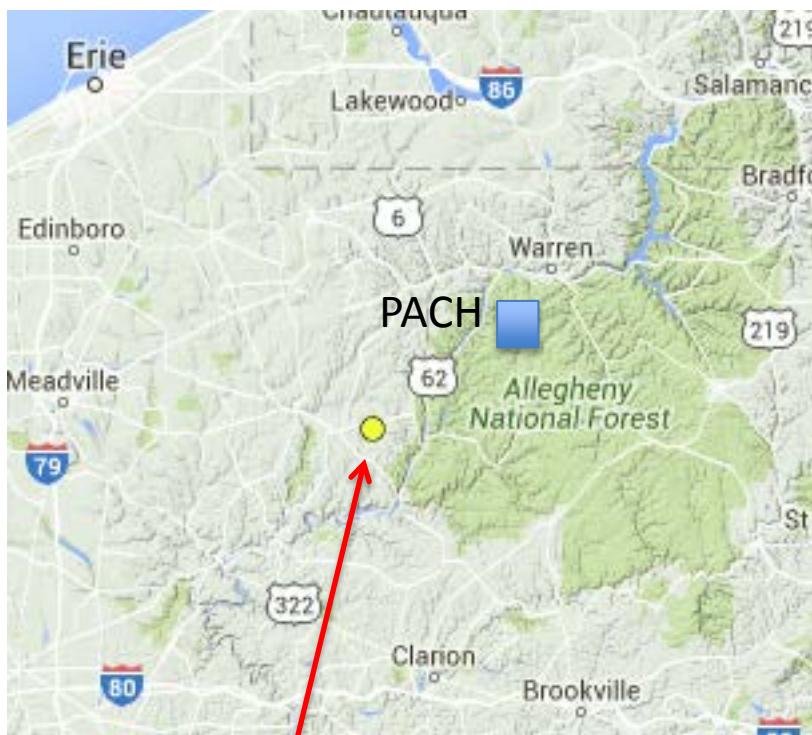

# Minor earthquake measures near city

Posted: Tuesday, April 19, 2016 12:08 am

By Stella Ruggiero [ruggiero@titusvilleherald.com](mailto:ruggiero@titusvilleherald.com) | 0 comments

A small earthquake, which was likely too weak to be noticed by anyone other than geologists, measured in the Titusville area on Monday, around 6:34 a.m.

The quake was magnitude 2.2, according to AccuWeather meteorologist Jordan Root. He said it was fairly weak on the scale, and not likely felt by many people, or maybe no one at all. As of late Monday afternoon, Root had received no reports of anyone experiencing the quake.

Magnitude 2.2

Time: 2016/04/18 06:34:40 local

Depth 3.3 miles (5.2 km)

Near Titusville, PA

## What do the data look like? (Chapman State Park)

## Example event with an undetermined source

May 11, 2017 Mag. 2  
Time: 2:54 am

Source depth = 1 km

No active fracking or wastewater disposal nearby

Waveforms look like a blast

Active coal mines in area but coal seam is at ~200-250 m depth

# Acknowledgments

Support for PASEIS comes from DCNR (Bureau of Topographic and Geologic Survey) and DEP

IRIS provides data management (data archiving and distribution)

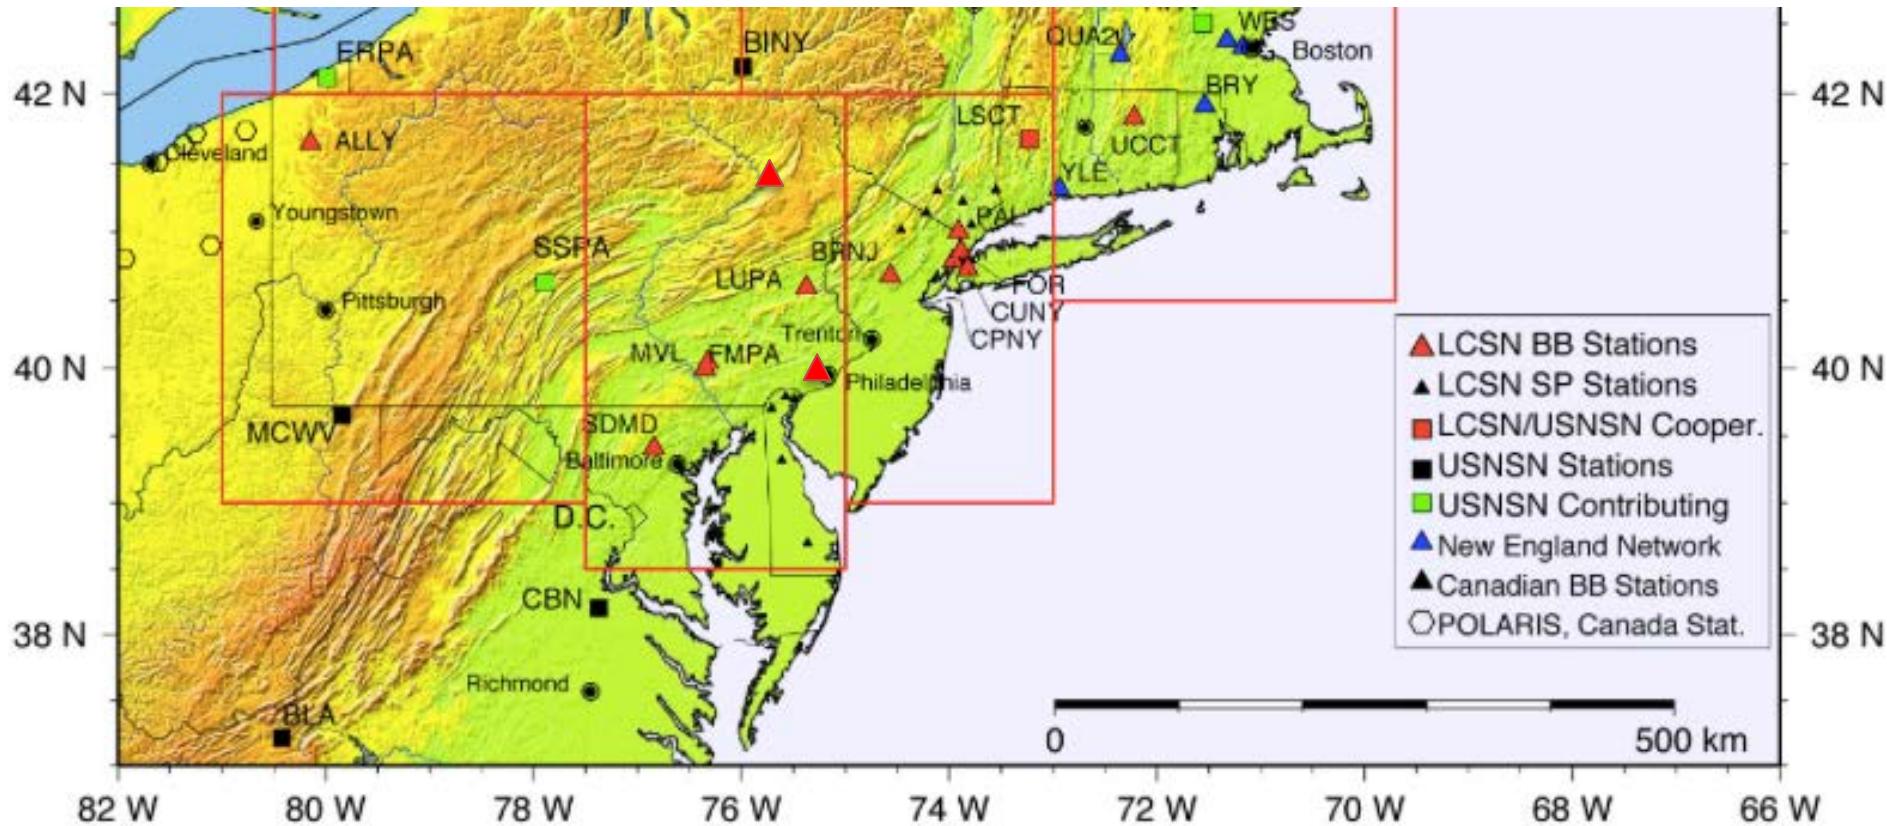

# Permanent seismic stations in PA through 2015

- USGS National Network (2 stations)
- Lamont Doherty Earth Observatory Cooperative Seismic Network (LCSN) (supported as a regional network by the USGS) (6 stations)
- Initial 10 PASEIS stations

## USGS and LCSN Stations

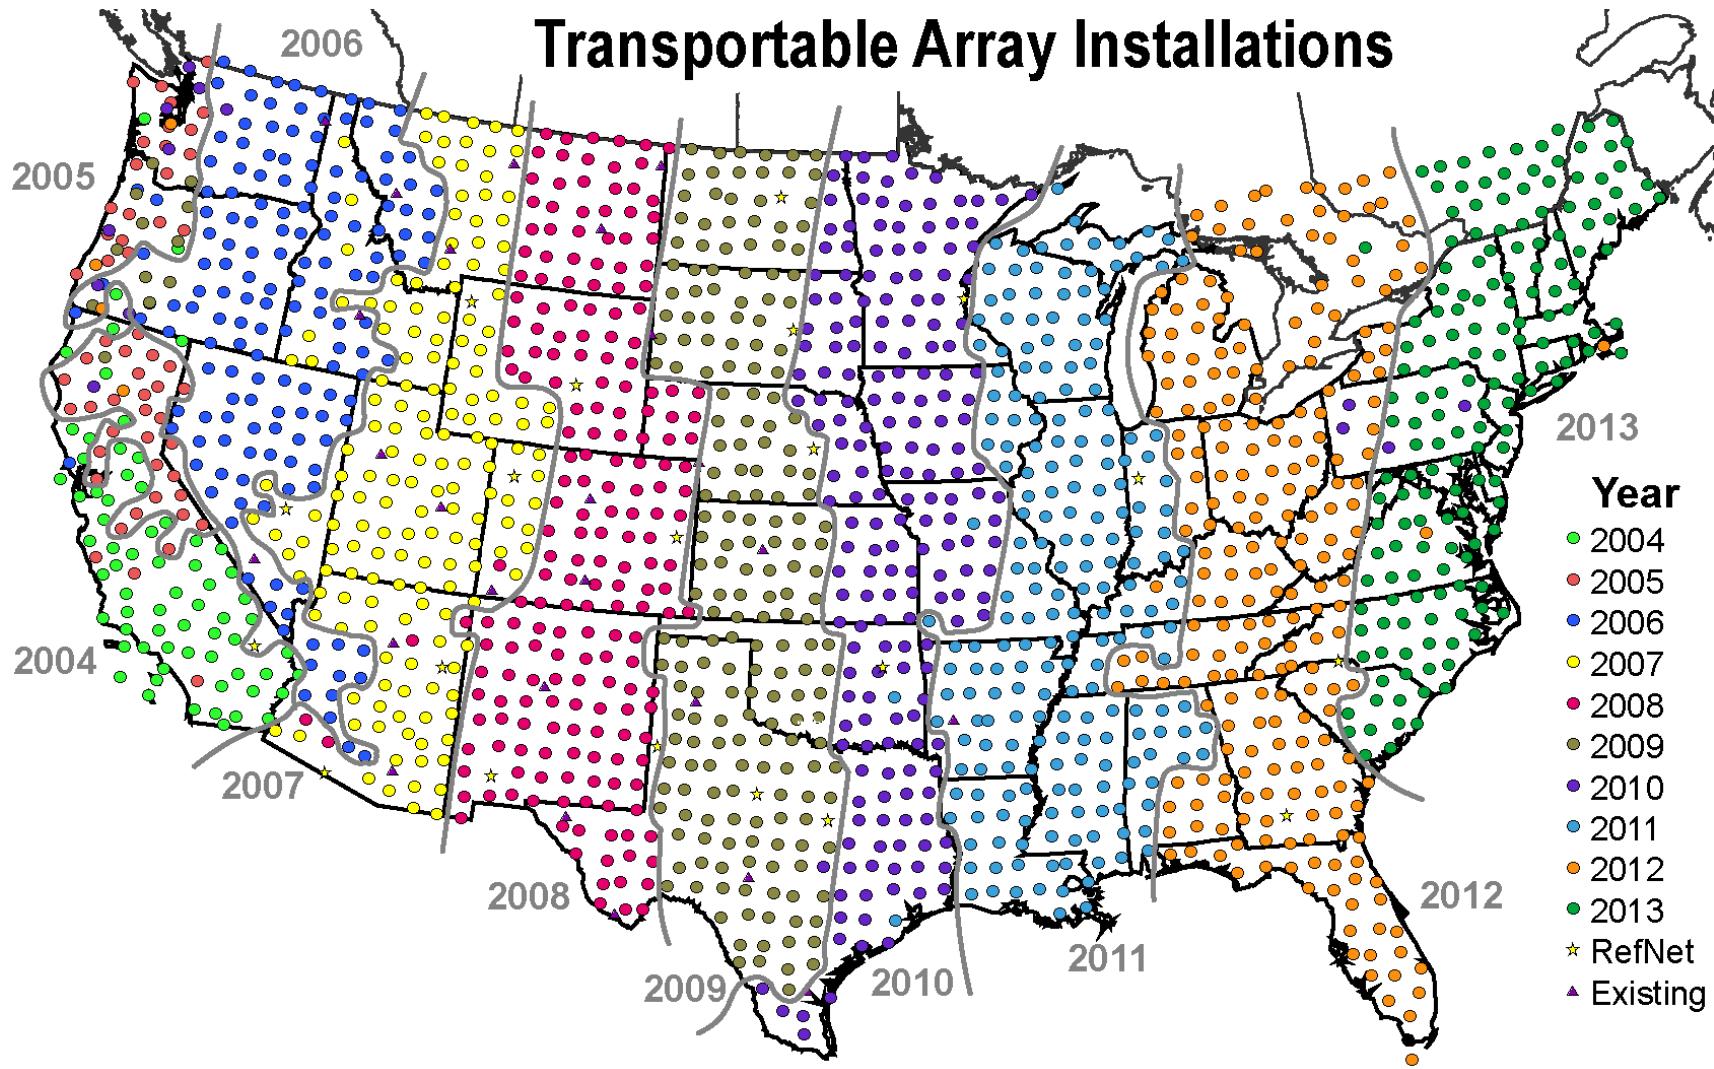

# History of building a PA state seismic network

- 2006-2009 Establishment of the first 6 permanent PASEIS stations – DCNR (data archived and distributed using the PE Network code)
- 2009 Carbon sequestration technical assessment - DCNR
  - *25 portable seismic stations*
- 2010 Purchase of 4 USArray stations from IRIS – DCNR
- 2013 Earthquake monitoring during USArray - DCNR
  - *Support for temporary network to densify the USArray network, develop seismicity catalog*
- 2015 Expand the 10-station permanent network to 30 stations and provide seismic event information – DCNR and DEP

USArray

# Basement deployments – mostly at university locations

# Outside vault deployments – mostly at state park locations

Information  
on how to  
request the  
data

# Earthworm Process

- Automatic detection and location of seismic events
  - Arrival time picks (P and S waves)
    - STA/LTA algorithm
    - Frequency band algorithm
  - Location
    - HYPOINVERSE code with velocity model for PA
- Alerts
  - Records event information and sends email alerts

Last Updated: Fri Mar 24 2017 10:17:48 GMT-0400 (EDT)

[Update Now](#)

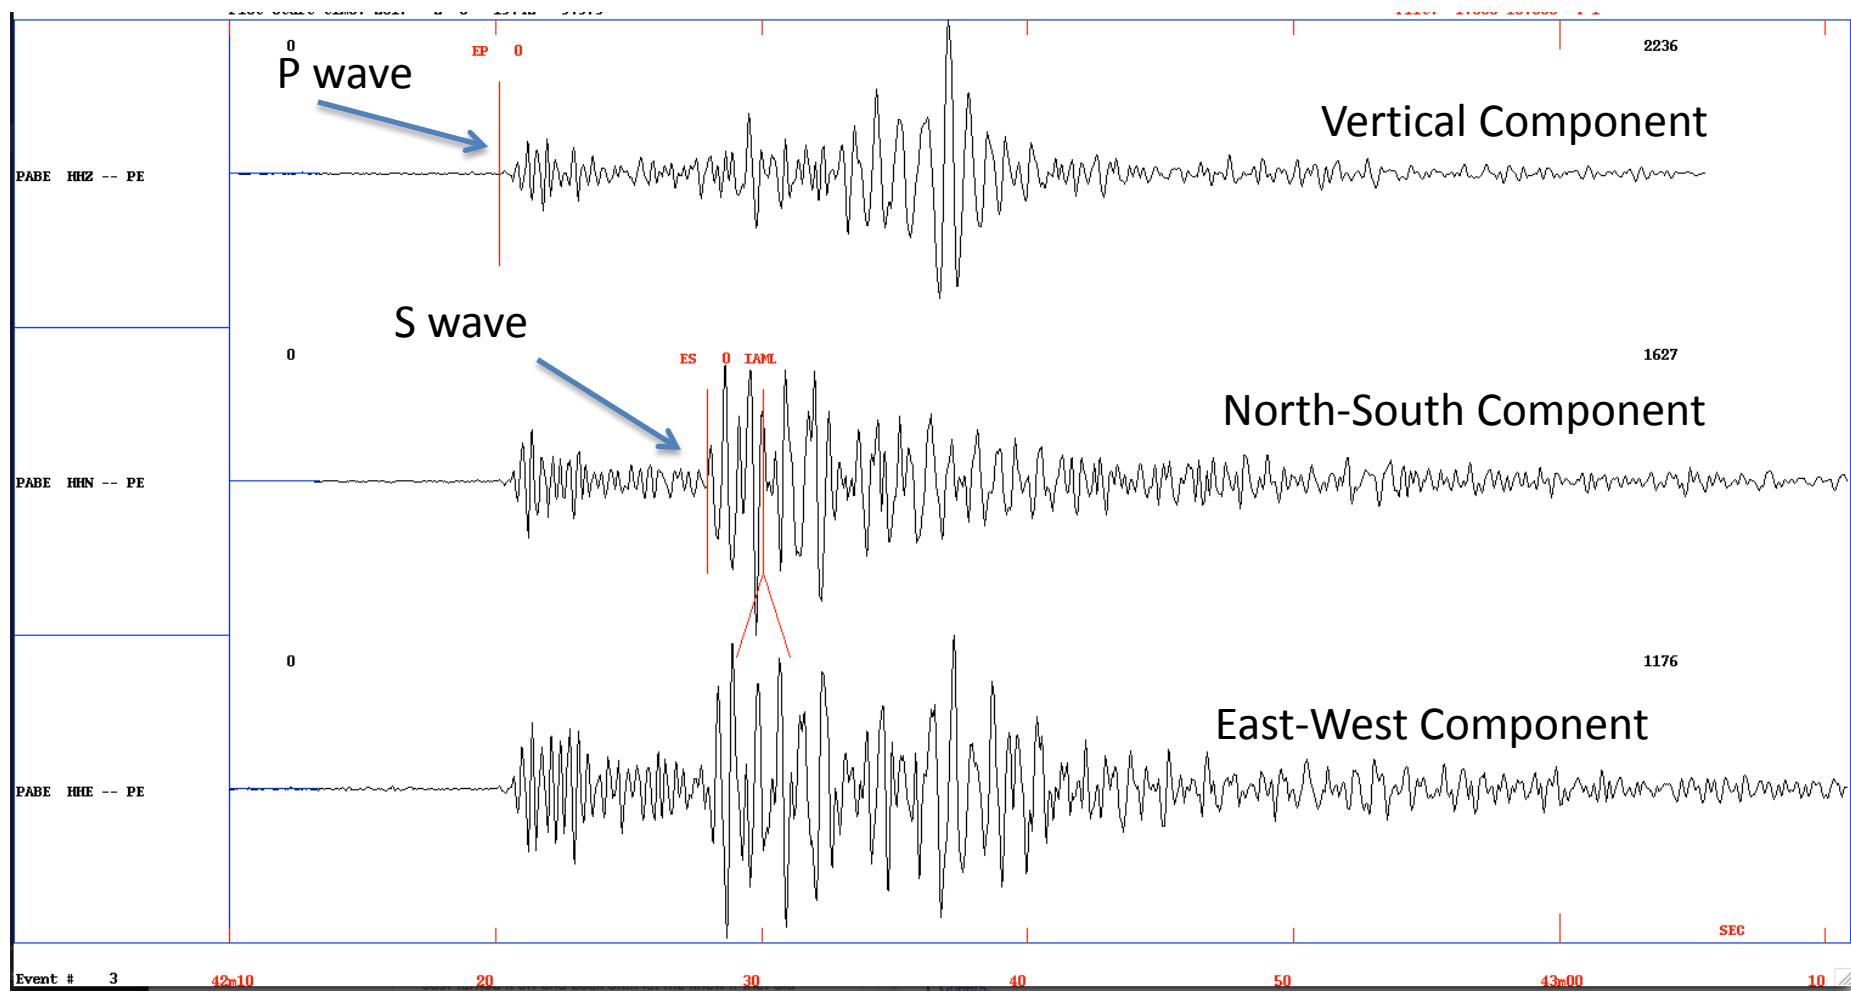

# Analysis of Automatic Locations

- Determine whether an event is real or a false detection
  - Use information on email alert
    - Waveform characteristics
    - Location of stations
    - Location of event (near to known mine?)
- If there is any indication that event might be an earthquake, then the event is manually relocated

# Manual Event Locations

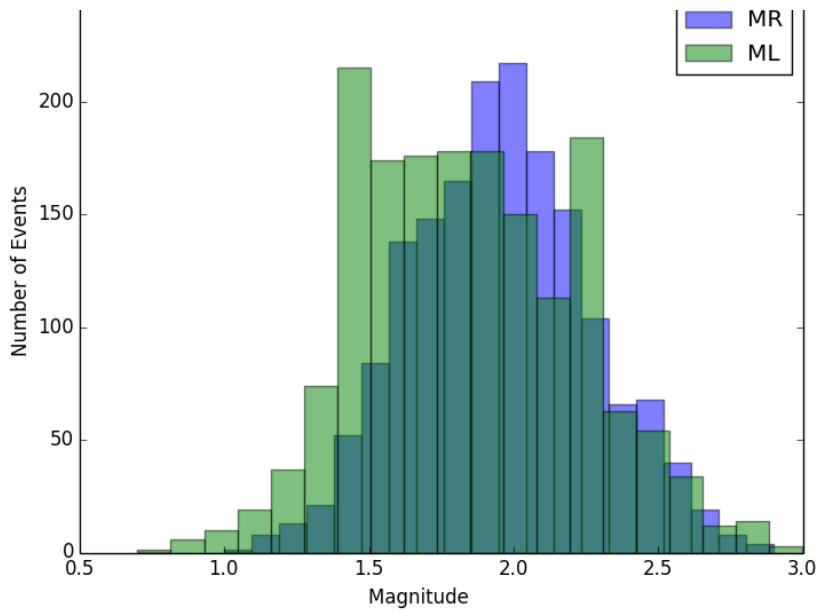

- Pull data from Earthworm server
- Refine arrival time picks by hand using SEISAN
- Relocate event using HYPOINVERSE and same velocity model as used for automatic solution
- Add event information to database and post on the website

# Example P- and S-wave arrival time picks from SEISAN

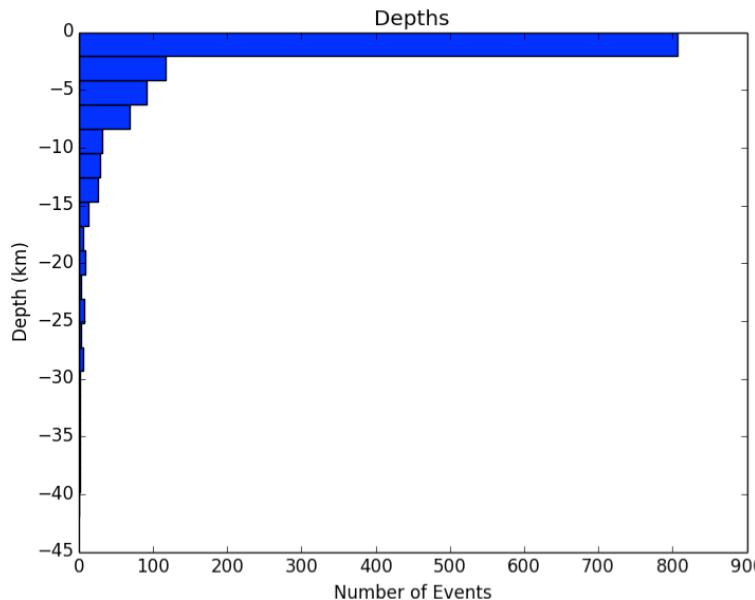

# Magnitudes and Depths

- Local magnitudes range from 1.0 to 2.9

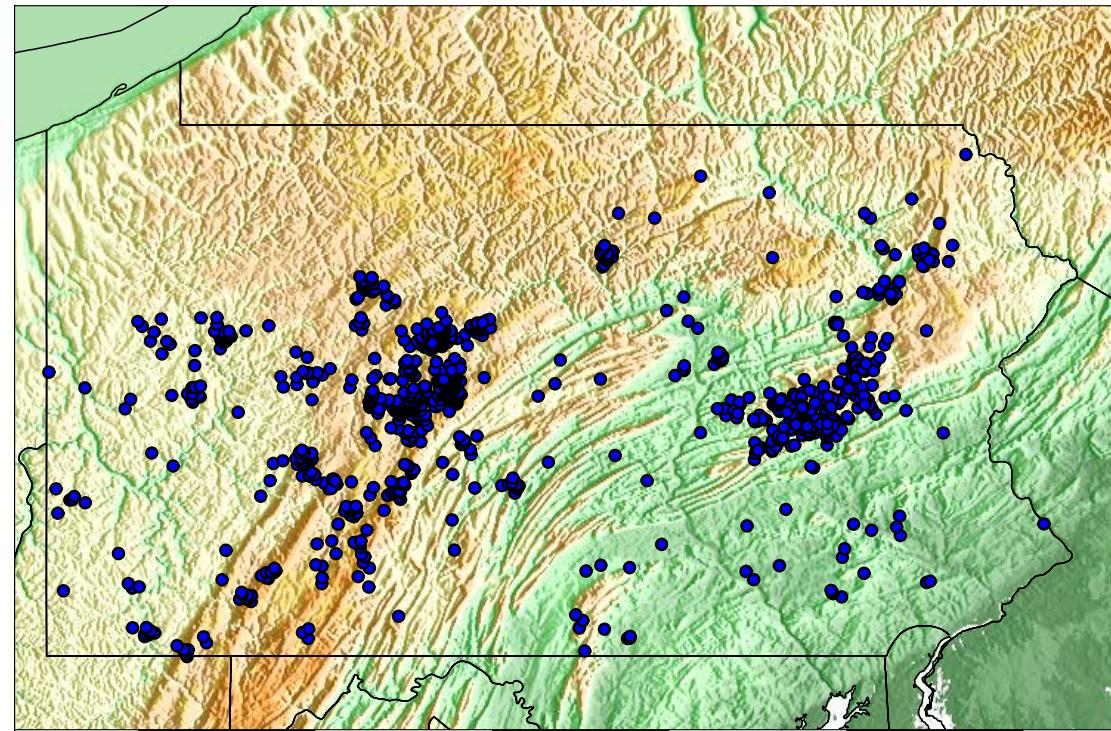

Catalog is complete to magnitude 1.8

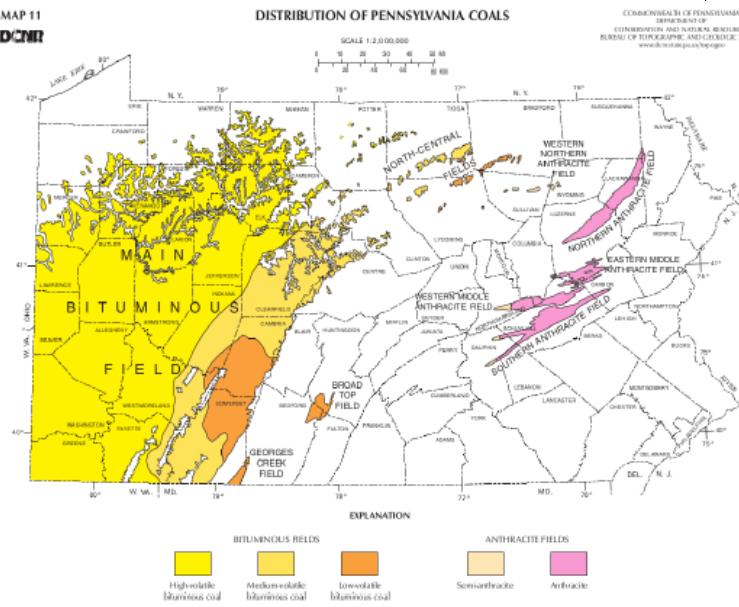

- Depths mostly < 1 km

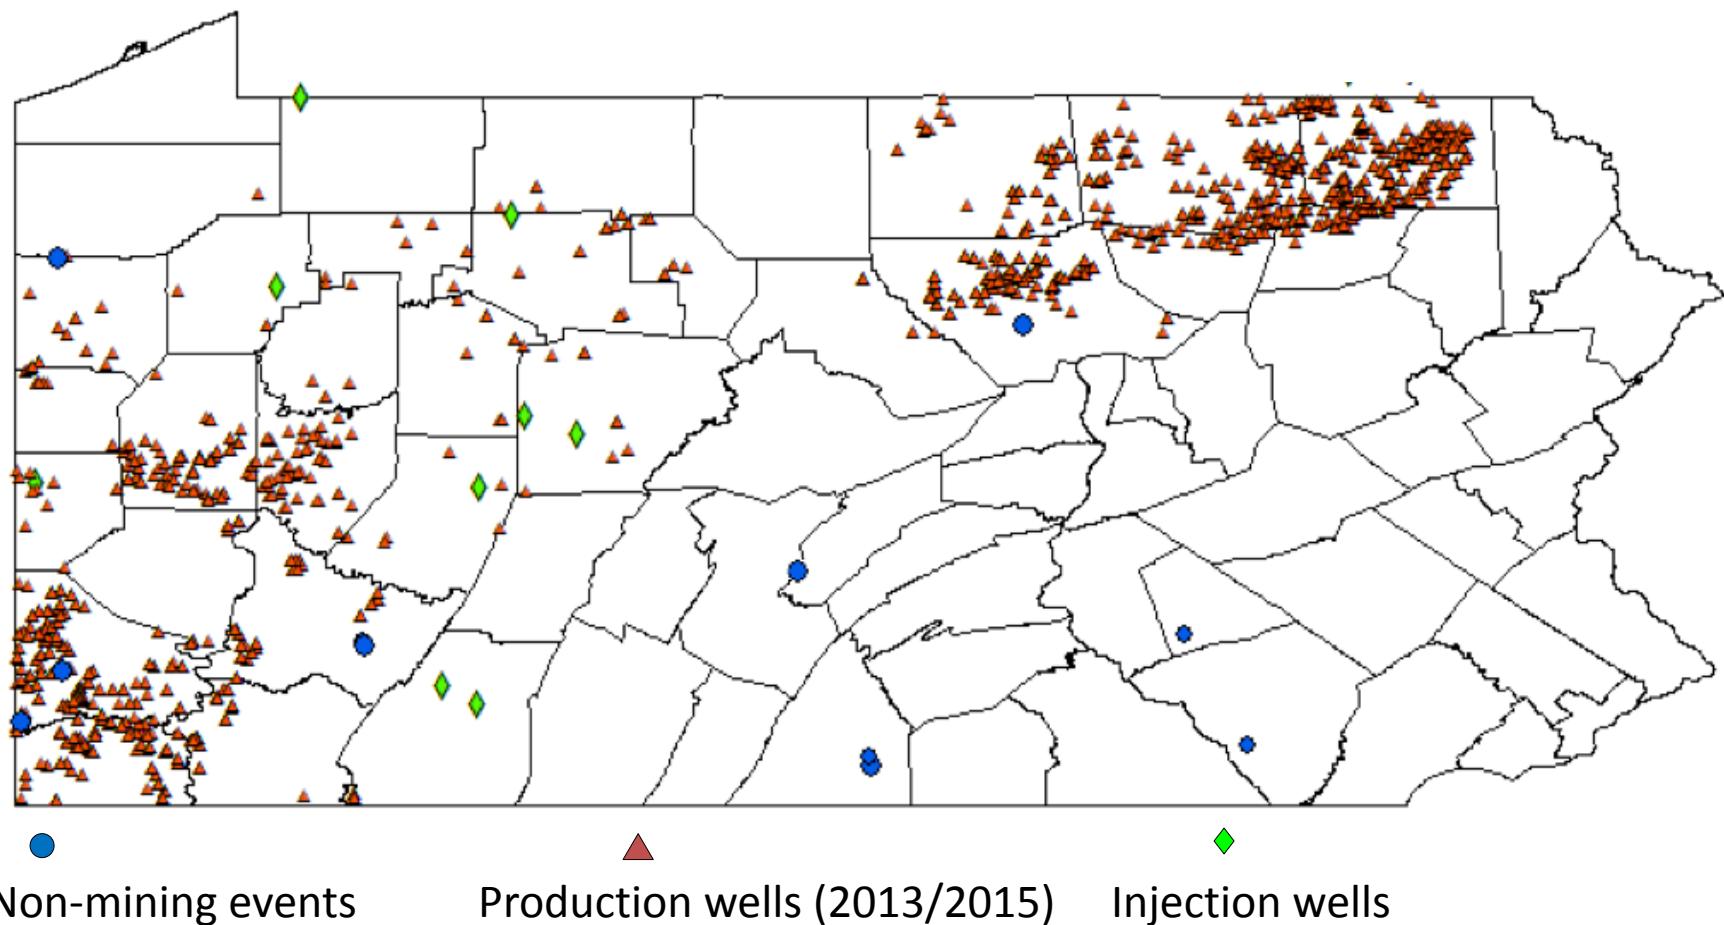

# Mine or Quarry Blasts

asts

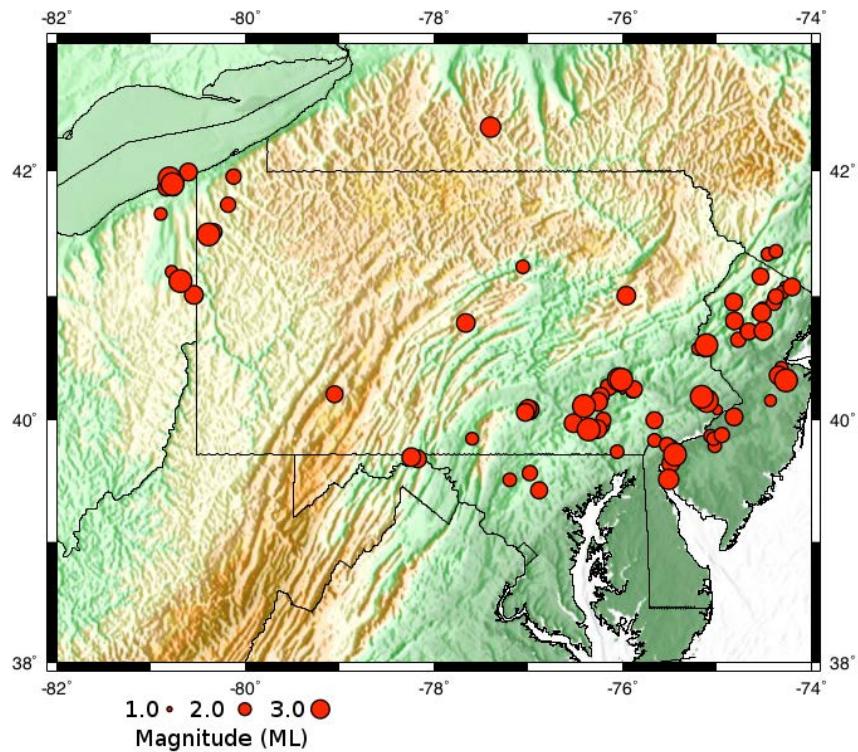

# Are there spatial and temporal correlations with well activity?

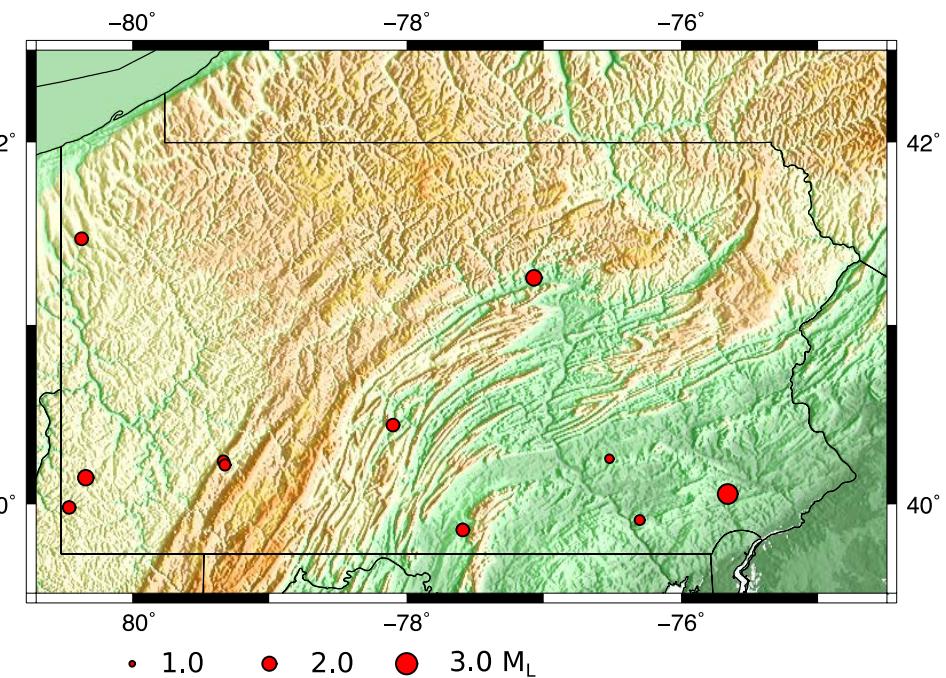

**-No correlation has been found with either injection wells or fracked wells for the 2013-2015 time period**

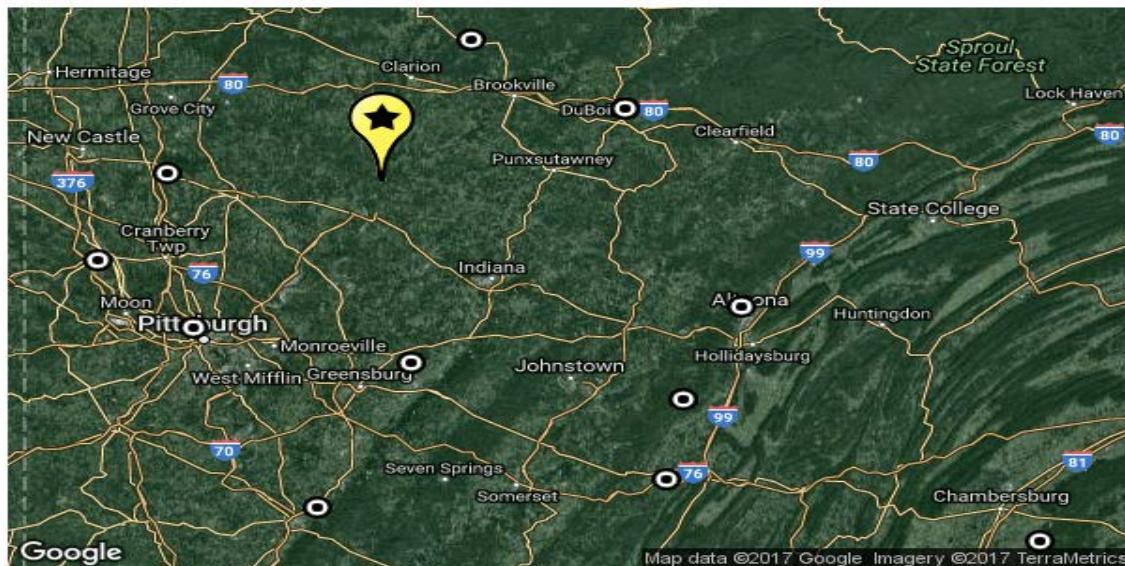

**Summary of findings:** 1530 mining related events  
14 Non-mining events – they are all probably tectonic earthquakes

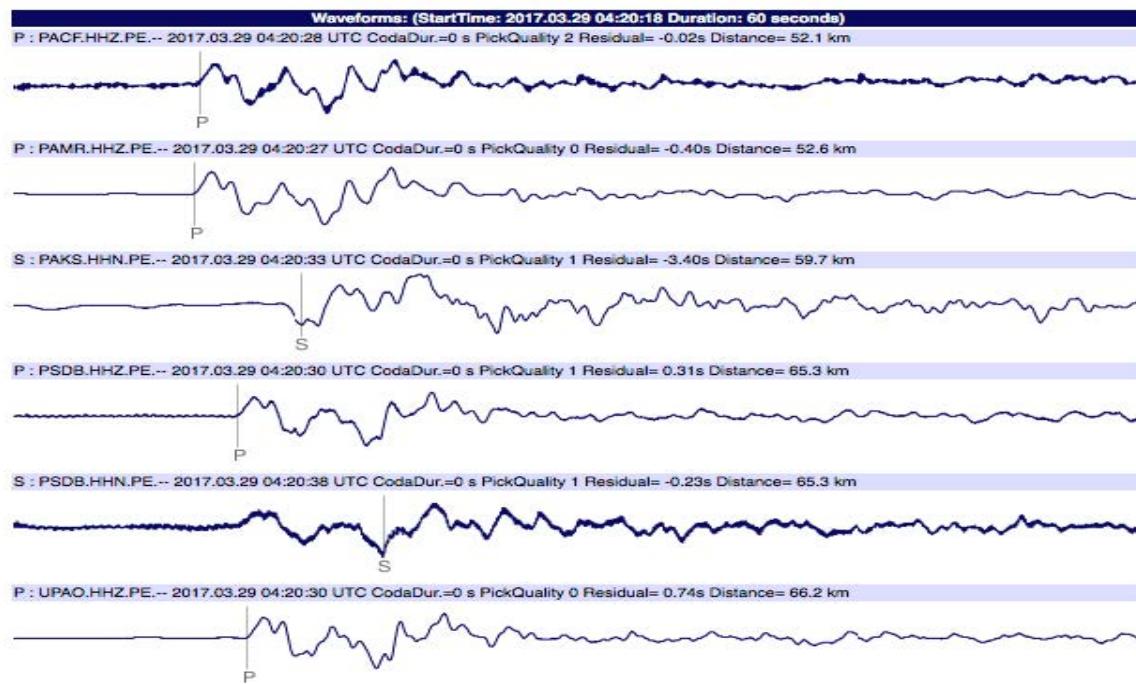

Historical

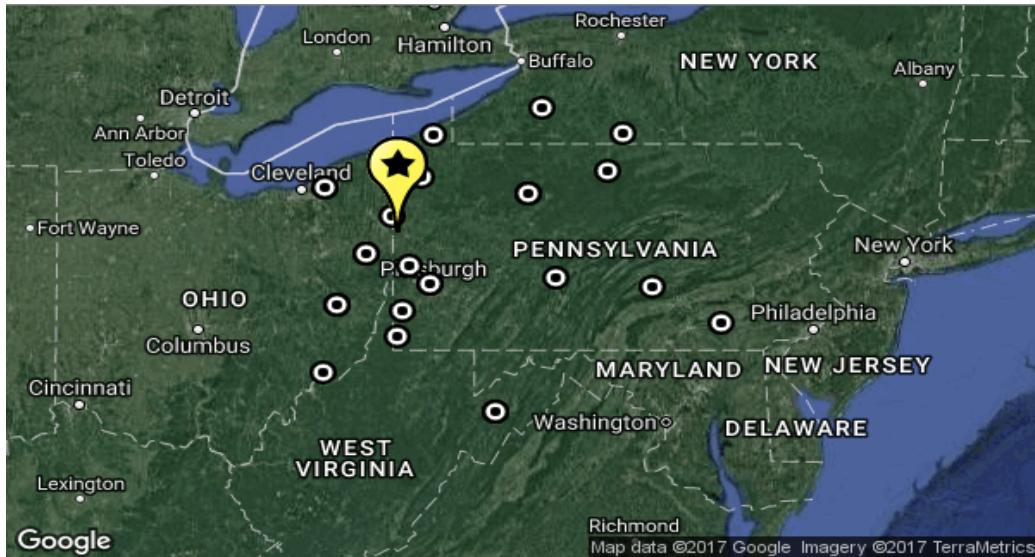

2/2013-6/2015

Example of an Email alert received for a Teleseismic event (large,  $M > 5$ )

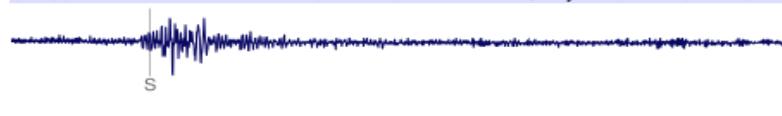

Email alert for one of the Lawrence County events of April 25, 2016.
